Activity Overview

In this Activity, you will practice creating, updating and retrieving FHIR Resources.

1. Introduction

Please do the following FHIR exercises.

Task 1: Add a new Resource (Make a POST)

Using the Patient Resource you have created in the first week, save the resource making a POST to the FHIR Server. Make sure the new Resource is successfully saved.

Task 2: Get a FHIR Resource (Make a GET)

GET the FHIR Resource using the ID that has been assigned by the server to your resource.

Task 3: Update the Resource (Make a PUT)

Using the Resource you retrieved in task 2, alter the line, city, state and telecom to different ones and send your edited resource for update to the server.

Note: You can practice and test these exercises at any test FHIR server

Activity Summary

After successfully completing this Activity, you will have basic knowledge how to manage FHIR Resources.
