Activity Overview

In this Activity, you will create your first FHIR Resource.

1. Build a Patient resource

You can submit your solution in XML or JSON format. You have to use the following data:

Your personal information

Identifier Your assigned HL7 FHIR Course identifier (1):

Name

- **First Name** : Your assigned FHIR Patient Given Name (2)
- **Last name** : Your assigned FHIR Patient Family Name (3)

Birth Date: your birth day (you can lie 😊)

Gender: your gender

Telecom: (03) 5555 6789 **use**: home

Address:

- **Line**: 3300 Washtenaw
- **City** : Ann Harbor
- **State**: MI
- **Postal Code**: 48104
- **Country**: US
- **District**: Washtenaw

Other elements as you see fit

NOTES:

- (1) Your FHIR Patient Identifier. By default is your firstname.lastname
- (2) Your FHIR Patient Given Name has to be the same as you have in your optional campus profile. By default is your name
- (3) Your FHIR Patient Family Name has to be the same as you have in your optional campus profile. By default is your Family name

To avoid posting personal information (last and first name) in a Public FHIR server, you can edit this information in your profile before performing the activity.
